# Cats

# Animals

Cats are furry, curious, and love to explore! Some cats like to sleep all day, while others love to chase after toys and climb high places.

Have you ever seen a cat wiggle its tail before pouncing? That means it's getting ready to play!

1.

Cats also make different sounds. A "meow" can mean "hello," and a "purr" means they are happy.

If you have a cat, remember to be gentle and let it come to you for cuddles. What do you think a cat dreams about when it naps?

**2.**

# What If? 😊

✔ What if the sky was green and the grass was blue? 🤔

✔ What if cats could talk and tell us funny stories? 🙄

3.

What if you could fly like a bird or swim like a fish?

What if you could visit the moon today..

4.

Now, with the help of your parents, come up with your own what ifs, something out of this world, something that you don't think can be true. But there may be a little chance of it happening.
